The Six-Inch Lunar Atlas: A Pocket Field Guide

By Don Spain

Springer. Paperback. Condition: New. 260 pages. Dimensions: 7.9in. x 4.9in. x 0.6in. Here is a lunar atlas designed specifically for use in the field by lunar observers. Its title The Six-inch Lunar Atlas refers both to the aperture of the telescope used to make the images in the book, and also to the book's physical size: so it's perfect for fitting into an observer's pocket! The author's own lunar photographs were taken with a 6-inch (150mm) telescope and CCD camera, and closely match the visual appearance of the Moon when viewed through a modest (3-inch to 8-inch) telescope. (Depending on seeing, of course.) Each picture is shown oriented as the Moon really is when viewed from the northern hemisphere, and is supplemented by exquisite computer sketches that list the main features. Two separate computer sketches are provided to go with each photograph, one oriented to appear as seen through an SCT telescope (e.g. the Meade and Celestron ranges), the other oriented for Newtonian and refracting telescopes. It is worth commenting that most observers find it extremely difficult to identify lunar features when using a conventional atlas and SCT telescope; the human brain is very poor at making mirror-image visual...

Reviews

This publication might be well worth a read through, and much better than other. It is amongst the most incredible book I actually have read through. I am delighted to tell you that here is the finest book I actually have read through inside my own life and could be the best ebook for possibly.
