

## Electricity and Energy Policy in Britain, France and the United States Since 1945 (Paperback)

By Martin Chick

Edward Elgar Publishing Ltd, United Kingdom, 2009. Paperback. Condition: New. Language: English . This book usually ship within 10-15 business days and we will endeavor to dispatch orders quicker than this where possible. Brand New Book. Martin Chick s book is a major economic and historical study of the development of electricity and energy policy in Britain, France and the United States since 1945. Using newly available archival material the author draws important comparisons between these countries and includes all of the fuel and power industries. Among the issues covered within this book are: nationalisation and privatisation; regulation, deregulation and liberalisation; marginal cost pricing; investment appraisal; the OPEC oil price hikes of the 1970s; the European Coal and Steel Community; domestic and international threats to national energy security; the electricity blackouts in California; the efforts of the European Commission to promote competition in national and transnational electricity markets; and the influence of history on current discussions of energy policy. The book blends economic theory with historical evidence and is as interested in the political factors affecting the implementation of theory as in the theory itself. It will be of interest to all students and scholars of environmental studies, politics, economics,...
