

Mobile Agent for Data Gathering in Wireless Sensor Networks

Filesize: 2.47 MB

Reviews

An exceptional pdf as well as the font employed was intriguing to read through. This is certainly for all who statte there was not a worthy of reading through. I am just delighted to inform you that here is the very best publication i actually have go through inside my very own existence and might be he finest pdf for actually.

To read **Mobile Agent for Data Gathering in Wireless Sensor Networks** eBook, you should access the button listed below and save the ebook or have access to additional information which are have conjunction with MOBILE AGENT FOR DATA GATHERING IN WIRELESS SENSOR NETWORKS ebook.

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Research Perspective | Mobile agent is a vehicle equipped with powerful transceiver and battery which finds the shortest path to gather data from the sensors and finally transports the data to the sink. The problem of minimizing the length of each data-gathering tour is mainly focused here. The mobile agent involves Bee Colony Optimization for travelling salesman problem. The Artificial Bee Colony algorithm (ABC) optimization is a population-based search algorithm which applies the concept of social interaction to problem solving. This algorithm is applied to the process of path planning problems for the mobile agents; it finds the shortest path for the mobile agents to collect the data from sensors as well as best in computation time. The effectiveness of the paths has been evaluated with the parameters such as tour length, agent travel time by Artificial Bee Colony Algorithm. This algorithm also prolong the lifetime of the sensors when compared to other existing approaches. Artificial Bee Colony algorithm has the advantages of strong robustness, fast convergence and high flexibility. This approach gives the best results for finding the shortest path in a shortest time. | Format: Paperback | Language/Sprache: english | 68 pp.
