

## Detroit Medical Journal, Vol. 3: September, 1903 (Classic Reprint) (Paperback)

By Frank Burr Tibbals

Forgotten Books, 2018. Paperback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*. Excerpt from Detroit Medical Journal, Vol. 3: September, 1903 Fig. 2. The Ligature in place and the Ferule ready to be pushed down when ends are stretched. Fig. 3. The Ferule pushed down and short end of ligature cut off. Ready for use. Since the adoption of the mcgraw rubber ligature in surgery, one of the chief obstacles to a finished technique in its use has been the fact that the ligature always made the orifice in the tissues much too large. The thickness of the ligature itself, even when under tension, and the fact that it had to be doubled at the eye of the needle were the two chief factors in this trouble. The style of needle which we represent, the design of Dr. Angus mclean, of De troit, Mich successfully overcomes the difficulty. It is so simple that its advantages must be self-evident, and yet it perfects the technique in the use of rubber ligatures. A slot in the eye provides for the easy introduction of the ligature into the butt of the needle; there is no threading...
