INFOSTRUCTURES: A TRANSPORT RESEARCH PROJECT (PAPERBACK)

Project Freerange, United States, 2010. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. INFOSTRUCTURE presents the vision of interactive and responsive urban public transport environments where new forms of communication and information access are enabled through an overlay of urban digital media technologies. Featuring research and projects undertaken by master students in architecture at the University of Technology, Sydney and Bachelor students in design computing at the University of Sydney, the book explores the augmentation of existing public transport environments with urban digital media technologies, to set in motion a transformation from infrastructure to infostructure(s). Precedent based research and technology investigations underpin the twenty featured student projects, that address a nexus of space, urban media, sensor, and mobile phone technology. The research presented in this book is a foundation for a series of future infostructure projects.
